Putnam, CT

Portfolio: <http://burstcreations.com>

Objective

My goal is to expand my horizons in Computer Science and use that knowledge to move your company forward in a positive direction.

Education

Eastern Connecticut State University

B.S. in Computer Science

Graduating May 2012

Current GPA - 3.6

Experience

Lab Consultant | November 2005 - May 2007

This position was a learning experience, and my first official technical position. I was required to supervise a computer lab for students, staff and faculty. During my presence there, I went beyond my duties and worked on projects that were not in my job description. I worked on programming a web application that would keep track of consultant time shifts, and the number of computers occupied during a specific hour.

- Customer Service
- PC/MAC Troubleshooting
- Documentation

Freelance Web Designer | September 2007 - Present

Freelancing has been a difficult venture, but very worthwhile. I have learned to deal with numerous types of clients with different personalities. I have had to change my approach many times, and my character and integrity has been tested many times. I focus mainly on small businesses and try to get them started in the right direction. My workflow usually goes from ideas on paper, to a sketch, then a mockup and, finally, several iterations of the website.

- HTML/CSS
- Adobe Fireworks CS5 / Gimp
- Balsamiq Mockups
- Ruby/Rails
- MySQL/sqlite3
- Wordpress/Drupal/Joomla

Skills

- Web Design - Compliant HTML/CSS with Javascript
- Web Development - Ruby/Rails, PHP
- Database Management - MySQL, sqlite3, MySQL Workbench, phpMyAdmin
- Programming - C++, Java, Matlab, Ruby
- OS - Windows, Mac, Ubuntu, Gentoo, CentOS, Fedora
- Project - Ubuntu Enterprise Cloud
